

> business is booming!

Welcome to RGS insite issue 6

Our regular newsletter celebrating a decade of drilling that keeps you up to date with RGS and industry news.

Rogers Geotechnical Services Ltd are site investigation specialists offering ground investigation and geotechnical services to developers, builders, structural and consulting engineers, architects, insurance companies, local authorities, piling and foundation engineers, private individuals and other geotechnical consultants.

Business is Booming

We are delighted to report that we've reported **strong trade figures** for the first six months of this year and are now projecting a **30% growth** annually.

RGS - which last year marked 'a decade of drilling' - continues to build its business following global recession and now employs 22 members of staff; an increase of three from last year.

In our recent press release, MD Emma Lewis said,

I am delighted to report that we are very close to achieving £1m in turnover by month nine of the year, so we are on target to hit budgets and are likely to exceed them. Anticipated growth for the year based on the past nine months' trading is 30%, which is very encouraging.

We continue to have a very strong varied client base, with no reliance on any single client or contract.

Looking ahead, current tender numbers and values are higher than previous years, and are certainly more consistent month on month. We are therefore anticipating the orders to continue coming in strongly for the rest of the year.

Our recent successes include:

■ LOGGING OUR 5000TH ENQUIRY

since Operations Director Chay Rogers established RGS over a decade ago with just one rig, a single engineer and a small laboratory.

■ PASSING RECENT AUDIT INSPECTIONS WITH FLYING COLOURS

- > ISO 9001 (Quality Management System)
- > ISO 14001 (Environmental Management System).

> In the case of the 9001 system this is for the 11th year running.

■ WINNING THE EATON SMITH LAW FIRM'S BUSINESS OF THE MONTH

■ SUPPORTING THE LOCAL ECONOMY

by continuing to create employment and offering work experience and graduate jobs to Yorkshire's young people.

It's testimony to our depth of knowledge and experience that we continue to build our business following global recession, allowing us to continue building our client base and to take on new staff.

Emma hits the headlines for all the right reasons!

RGS secured **fabulous coverage** in The Huddersfield Examiner following a visit by their business editor Henryk Zientek who wrote a great in-depth profile about our MD Emma Lewis.

To read the full article, please [click here](#) - it shows both Emma and RGS in a highly positive light.

Good news all round!

BUILDING FUTURES

Sowing the seeds of Success

RGS is delighted to be supporting a community project run by our clients, Wakefield and District Housing, to create a planting and wildlife garden at **Newlands Infants School** in Normanton

We have **donated 20 boxes** and paint to create 1m-long planters for the scheme, which will also include a picnic area, insect houses made by the pupils themselves, bird tables, nesting boxes and hedgehog houses.

We will report more on this project as it gets underway.

GREAT PROJECT!

BUILDING FUTURES

Supporting local graduates

RGS prides itself on helping local graduates to get their feet on to the first rung of their chosen career ladders and we were delighted to hear from **Charlotte Mason**, who completed work experience with us back in 2011 from **Greenhead College**.

Charlotte - who will be joining us again for work experience later this year - said in a recent email

Since our last conversation I have been very busy furthering my skillset and have **now graduated** from the **University of Leicester with a Geology BSc Second Class Honours (Upper Division)**! I am currently searching for work experience/part time work to fill in my gap year before I potentially start a Masters Degree in Geotechnical Geology in October 2016, a desire that was very much fuelled by my first visit to RGS in 2011.

I would also like to thank you and your colleagues for offering me my first industrial experience in 2011. If it had not been for that placement I doubt I'd have taken and loved my degree path.

Your placement was invaluable to me, and your staff were so helpful and accommodating. **Thank you.**

We are delighted to have helped Charlotte to make a successful career choice and wish her the very best of luck for the future.

Client Feedback: we want to hear your views!

We have received **excellent feedback** from our clients' survey - it appears that those who have already responded are very happy with us, which is great news!

We will be continuing the survey later this year, in a bid to gauge wider feedback - please keep an eye out for it as we'd love to hear what you think!
